PROJECT DETAILS

FRONT END: A GUI app built with C# using Visual Studio.

BACK END: Back end of the app will be in MySql.

MOTIVATION:

Usual information systems used at toll plazas are outdated and unmanageable. This Desktop App will renovate the Tax system with its features. Maintaining the data of flow of traffic and data of customers.

RELEVANCE:

This App can be deployed on Toll plazas at highways or private roads. Creating a registry of every car that passed from the toll.
